COMS'18

24-26 September, 2018
MONTREUX 

COMMERCIALISATION OF EMERGING TECHNOLOGIES

SCOPE

Smart Factories are part of a new trend towards flexible and customer centric production. The ultimate goal is to make personalized products at the costs and with the reliability of high volume production.

The format of the sessions will include invited high level international speakers and panel discussions with high quality moderators.

International benchmarking, with best practices in Switzerland - Germany - USA - Japan.

MAIN TOPICS

- CUSTOMIZED MANUFACTURING
- SENSOR NETWORKS AND DATA ANALYTICS
- COLLABORATIVE ROBOTS (COBOTS) / FUTURE OF ROBOTICS
- COMMERCIALIZATION OF EMERGING TECHNOLOGIES

CALL FOR SPEAKERS

A call for Speakers is open until March 29, 2018. Please see the conference web site for full details.

ORGANIZERS

- Mancef - Micro, Nano and Emerging Technologies Commercialization Education Foundation (Conference Chair: Prof. Dr. Volker Saile, Karlsruhe Institute of Technology, President)
- ASME - The American Society of Mechanical Engineers
- FSRM - Swiss Foundation for Research in Microtechnology (Conference co-Chair: Philippe Fischer, Director)

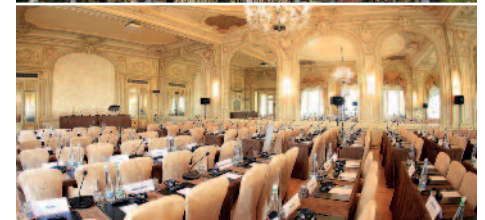

EXHIBITION

A technical exhibition will be held during the conference. Sponsorship packages will be available for companies that wish to increase their visibility.

VENUE

Montreux, Switzerland
Suisse Majestic, Grand Hotel

Directly in front of the main train station in Montreux, overlooking Lake Geneva and the Chablais Alps.
